SUMMARY

Product-focused full-stack developer and designer with 23 years of software experience, including 10 years of product design, 4 years of UX/UI, 5 years in decentralized apps, and 17 years in business development. Experienced in building user-friendly interfaces, accessible design systems, and scalable full-stack products.

I've been a stay-at-home dad for 8 years while continuing to lead independent development, consulting, and community projects. I value clear communication, flexible structure, and creative collaboration.

12-year FetLife member and polyamorous community organizer, experienced designing for privacy, consent, and trust.

CORE SKILLS

Design & Product:

Figma • UX Research • Wireframes • Prototyping • User Journeys • Design Systems • Accessibility

Frontend:

HTML • CSS/Tailwind • JavaScript • TypeScript • React • Next.js • Vue.js

Backend:

Node.js • Python • REST • GraphQL • API Development

Web3:

Solidity • EVM (Ethereum/Base/Polygon) • Wallet Integration • Smart Contracts • Tokenomics

Other:

Product Management • Business Development (17 yrs) • DevRel • Technical Writing • Remote Collaboration

EXPERIENCE

Independent Developer, Product Designer & BizDev Consultant (2013–2025)

Focused on product design, full-stack engineering, and business development for web3, AI, and civic tech projects.

Highlights:

- Designed and built full-stack web apps using React/Next.js, Node.js, Python, and Solidity
- Developed UI components and design systems in HTML/Tailwind and Figma
- Managed feature planning, prototypes, and usability testing
- Delivered technical writing, developer onboarding, and documentation
- Balanced technical consulting and parenting as a stay-at-home dad
- Supported startup clients with BD strategy, GTM planning, and partnerships

Key Projects:

- **Pharo.tech:** Decentralized insurance platform (product & engineering lead)
 - **SiPPP:** Photo provenance and verification protocol
 - **NWTT:** Crypto mining supply chain tracking system
 - **SideventS:** Web3 event management tool
 - **CryptoRides:** Crypto-funded transportation to voting locations
-

Consulting Roles

Amplified Expertise / Spring Global — Lead AI Architect & Developer

Picnic — AI Developer

Optify — Product Manager & Business Development

Lobby3 — Product Development & Community Relations

U.S. Department of Defense — Algorithm Developer & Engineer (2002–2013)

Developed algorithms and simulation systems for secure defense applications.
Focused on reliability, precision, documentation, and team collaboration.

COMMUNITY & LEADERSHIP

FetLife & Alternative Lifestyle Communities (12 Years)

Active FetLife member and event organizer supporting polyamorous and kink-friendly networks.
Experienced with consent, privacy, and inclusion in digital and real-world spaces.

Founder — Data Community DC (2012–Present)

Founded one of the largest grassroots data-science communities in the U.S.
Organized educational events, mentorship programs, and collaborations for 13+ years.

EDUCATION

Bachelor of Engineering, Engineering Physics — 2001

AVAILABILITY

Remote • Full-time or part-time • Minimum \$100k/year
